

Company Fact Sheet

Description	TowerJazz, the global specialty foundry leader, manufactures integrated circuits, offering the widest range of customizable CMOS specialty wafer processes and providing world-class design enablement tools for the quickest path to design success. TowerJazz's modular processes enable superior solutions for targeted designs, quickly meeting customer needs and facilitating fast time-to-market for their innovative products. The Company also offers transfer optimization and development process services for IDMs and fabless companies to expand capacity or provide second sourcing. TowerJazz customers are focused on markets including Power Management, Wireless, High-Performance Analog (HPA), Automotive, Medical and Aerospace & Defense, among others.		
History	Tower and Jazz merged in September 2008 in a stock-for-stock transaction. Tower Semiconductor was founded as a National Semiconductor spin-off and it became a public company in 1994. Jazz Semiconductor was formed in 2002 as a spin-off of Conexant Systems. TowerJazz shares are traded on NASDAQ (TSEM) and Tel Aviv Stock Exchange (TSEM).		
Headquarters	Israel – Ramat Gavriel Industrial Area, P.O. Box 619, Migdal Haemek Israel 23105 Tel. 972-4-6506611, Fax. 972-4-6547788 U.S. Subsidiary – 4321 Jamboree Road, Newport Beach, CA 92660 Tel. 949-435-8000, Fax. 949-435.8757 www.towerjazz.com		
Facilities	TowerJazz offers fab capacity on three continents. To provide world-class customer service, the Company maintains two manufacturing facilities (6" and 8") in Israel, an 8" fab in the U.S., and has access to additional capacity in China through manufacturing partnerships.		
Technology/ Design Enablement	In addition to digital CMOS process technology, TowerJazz offers specialty CMOS processes with geometries ranging from 1.0- to 0.13-micron, including: SiGe, BiCMOS, Mixed-Signal & RF-CMOS, CMOS Image Sensor (CIS), Power Management (BCD), and Non-Volatile Memory (NVM) as well as MEMS capabilities. The Company also offers an industry recognized design enablement infrastructure to provide an environment optimized for analog and RF designs. Unique tools such as Monte Carlo statistical and PCM-based models allow users to maximize the performance-yield tradeoff and provide them with a significant competitive market advantage.		
Customers	TowerJazz currently serves leading semiconductor companies including: Atheros Communications, Conexant, Cypress Semiconductor, DRS Technologies, Entropic Communications, Gennum, International Rectifier, Ikanos, Intersil, Marvell Technology Group, Freescale Semiconductor, NXP, Mindspeed Technologies, On Semiconductor, Panavision, RF Micro Devices, Semtech, SiTime Corporation, Skyworks Solutions, Vishay Siliconix, Teledyne Scientific and Imaging, Texas Instruments, VIA Technologies, Xceive, and Zoran Corporation.		
Work Force	Approximately 1600 employees		
Management	Russell Ellwanger Shirazi Oren Itzhak Edrei Ephie Koltin Nati Somekh Gilboa Dalit Dahan Rafi Mor Marco Racanelli Avi Strum Zmira Lavie Don Cerney	Chief Executive Officer Chief Financial Officer and Senior Vice President of Finance Executive Vice President of Business Groups Senior Vice President, Worldwide Operations Senior Vice President, Chief Legal Officer and Corporate Secretary Senior Vice President of Human Resources and Information Technology Senior Vice President and General Manager, Newport Beach Senior Vice President and General Manager, RF/HPA Business Unit and Aerospace & Defense Business Group Vice President and General Manager of Specialty Business Unit Vice President, Process Engineering R&D, and General Manager, Transfer, Development and Optimization Process Services Business Unit Vice President, Worldwide Quality and Reliability
